Are we ready for the giant leap of economic growth?

Business and industry has expanded across the continents in the last two decades. Unlike the old world in which only the major economies dominated the business scene, the emerging economies have registered unprecedented rise. Sensing the opportunity, multinationals have crossed boundaries and headed towards greener pastures where the growth is and growth would be.

Are we ready for the next big leap of economic growth? Do we have the talent pool which the world of business eagerly awaits? The answer to these questions lie in educational institutions which have been entrusted with the task of providing well-trained human resource that can take the economy on their shoulders and catapult the world into the future.

The fact is that while economic growth has happened and is expected to happen at a greater speed in a world in which human resource produced in the best of institutions is not found to be industry-ready to join the futuristic nature of business today.

Hence education has to strengthen its role and remain relevant to the fast developing world. Education will have to render skills development as an integral part of its endeavors to empower the youth and empower the nation at large.

We all have a greater role to play in the nation building process. We need to retrospect our process of empowering the youth. We need to develop learner-centric education. Teachers should practice skillful teaching-learning so that it could help students to understand ways of applying the skills by themselves. Students have to be able to formulate, analyse and solve real life problems using creative techniques.

Nitte University and Nitte Education Trust have established teachers and staff training institute towards achieving effective teaching and training students to face the challenges of the future. We are committed to creating skilled human resource for a greater role in nation building.
Contributions of articles, news, poems, anecdotes, jokes, photographs, drawings, paintings, cartoons, caricatures etc., are invited from students, teachers, employees and alumni of Nitte Education Trust and Nitte University.
Let us aim high for a greater goal.

Here is yet another issue of Nitte News. I hope you will find it interesting and informative. I take this opportunity to thank all individuals and institutions who have contributed to this issue. At the same time, request everyone to continue sending news and articles regularly.

The new academic year has just commenced. While I extend a warm welcome to the new comers in various disciplines of studies, I request all others to guide them and extend all supports in making their academic life comfortable. I am sure, the teachers and staff will make sincere efforts to see them succeed in their studies and mould them to be good citizens as well.

Graduation Day was held at NMAMIT Nitte, NMIT Bangalore and JKSHIM Nitte. Nitte Institute of Physiotherapy has completed fifteen years of its existence. The Graduation Day was held on June 30, 2012. While I wish all the graduates and post-graduates from these institutions bright future and success in their life, I hope they will serve the society with sincerity and dedication.

I look forward to the year ahead with great expectations. I seek everyone’s support and sincere efforts in making our institutions conducive for better learning and career building. Let us aim high and make all efforts to achieve greater goal. Above all, let us make our institutions lustrous seats knowledge and wisdom.

Graduation day

The possibilities of next decade for Indians are tremendous, according to Mr. K.V. Kamath, Chairman ICICI Bank and Chairman Board, Infosys. Speaking at the XIII Graduation Day of the Institute, he said: “In many ways we are at the same stage as China and therefore the possibilities for the next decade for us are tremendous. Structurally, India is in the same position, as the economics of China, Japan and South East Asia are in just prior to their growth phase”. “We do have the potential of achieving the same results as they have”, he said.

Terminating demography as the most important driver of growth in India, Mr. Kamath said that by 2020 the demographic advantage in India relative to the rest of the world will become even more significant.

By 2020, the middle class population in the country would be close to 80 million and per capita income would be $400. The ramifications of this are immense, resulting in demand or better living environment and an accelerating consumption cycle. Economic growth leads to a demand for better services, infrastructure and a spurt in consumption demand. Infrastructure development will be a key priority and investment in infrastructure is projected to increase to over 9 percent of GDP, he said. Stating that economic growth will lead to a higher demand for urbanization, Mr. Kamath said a significant proportion of growth is expected to come from the next level of cities. The changing character and potential in rural India should further catalyse the progress. Both the private and public sector have to jointly provide wide-scale vocational training to quickly enhance the capabilities of people, he added.

Prof. (Dr.) M. Shanthram Shetty, Pro-Chancellor, Nitte University presided. Director of the Institute Prof. K.R. Karnik, administered the oath. Mr. Rakesh Shetty was awarded the Best Project and Academic Topper Award. Mr. Shawaaz Gulam Yasin emerged as the Best Outgoing Student of the Institute for the year 2012.

Talk on “Stopping Corruption”

“Don’t give bribes and don’t take bribes”, said the former Lokayukta of Karnataka and former Supreme Court Judge, Justice N. Santhosh Hegde while addressing the students on 19th July, 2012. Justice Hegde stressed on how the evil of corruption had spread its tentacles in Indian society. He entreated the youngsters to morally support the ‘Anna Hazare Movement’ for a strong ‘Lok Pal Bill’, which may not be the magic wand that wipes out corruption but will at least succeed in checking corruption to some extent. He stated emphatically that corruption is the root cause for the rising prices and economic crisis and if corruption has to be stemmed, it has to be done at the grass root level itself.

There were several questions posed by the students that Justice Hegde answered readily. When asked how one Lok Pal Bill could stop corruption, he in turn asked whether we should shut down courts because cases get delayed or police stations because crime continues unabated. He requested students not to have a pessimistic attitude and to be more positive in their outlook.
